:roll: :roll: umm, shouldn't there be a bunch of helicopters visible in the picture ??
Well, I can see one spot -- this should account for the many simultaneous pictures?

I also don't like that the camera is swinging around. Have no one used a REAL hand-camera before?
You can also not stabilize a picture from an amateur camera. The resolution is not high enough.
So, we are to believe that Mats Ã–gren first mounted his camera on a tri-pod, and then start panning?
8)

We register the Mats Ã–gren Shot with a clear blue sky.
