The following photo explain that this is indeed an earth photo.
This is also an example on how to maintain a lie of this kind:

1) As long a fake picture is not debated, it is of course taken for genuine!
2) But when a picture is found to be faulty, the new hi-res picture surface,
"no, it is from a training exercise ....".

But remember, copy-original taken directly from the Hasselblad negative,
has also been found to be in error.
