911_clips_collection_to_tufavideo_net.torrent:
TV\Massive_Eject_Size_ANSI_D_Drawing_Papers_DR1_B36.flv

Adjusted to U.S. style paper formats, it looks like ANSI-D-sheets. Very large, approx 50cm-70cm.
Compare with the modulus of the perimeter columns, that is 40 inch or 1016mm.

You know all along that, to look "real", LARGE sheets was used? Right?

This picture is from the torrent 15 - Broadcasts.torrent, file /NBC4/9-11 - 0851-0912 NBC4 Washington.mpg

Compare the size of the "paper" with the length between windows of the tower. The width is exactly 40" or 1016mm.
