This nice film try to uncover the 911 Hoax, as best possible, using the early 2003 material. Excellent and detailed analysis of the Pentagon "Plane" flight 77. This part of the film contain discussions not found elsewhere.
The film is somewhat limited in that the Rubble Pile analysis is not yet thought of ... that the Rubble Pile of the Towers, and why not also Pentagon, was simply a photo fraud. The evidence columns is there clearly in frame, for any one to see .. now when we understand what to look for!

For Pentagon plane much more can be sad, but none is needed.

For the entire Fraud much more was uncovered later, but the material contained is enough.

Recommended !
