Crowd CGI? - 4/29/11 Royal Wedding

Postby grav Â» 29 Apr 2011 20:59:
i watched these huge crowds moving on video live on Fox so i know it's not a photoshop, but curious about CGI capability for human crowds. this seems like an opportune time to give it a good test-run. google-images didn't provide many hi-res shots, unfortunately.

you can watch the fox video here (the crowds at victoria memorial start at around 3:30)
http://www.foxnews.com/royal-wedding-kate-and-william/?test= faces

this is the only video i can find on youtube of the crowds

here's a video on scene where you can barely see the crowds in the back left...
