This film explain the complex 9/11 issue, and try to do that concisely, and get to the point in just 30 min. It is based upon material known since 2010. It use the standard video material from various TV broadcasts.

Note that U.S. NIST have released all the so-called 9/11 catastrophe photos for public use. There are thus no infringement of any rights.

I wish to thank many people for reweaving the film, and many suggestions have been included in order to get to the core 9/11, without using prior knowledge the viewer may not have.

The purpose of the film is to stop illegal influence of the Swedish Court, and should anyone tamper with the film material, or attempt to derail its legal distribution, the jail time is rather high. It may be called co-operation in threatening the Court.

Don't mess with gluing the parts together.
I release the uncut version as a torrent a bit later.
... but it cannot be right now; the subtitles needs more fixing

This one calculates the retardation force from the tower onto the "Plane" with the result that can never be any "Plane".

And here is the impulse-law analysis. You tell me, if there is ANY physics-law that are 9/11-compatible.

Welcome to my P08, and here I will kill almost all still pictures. If you have not seen this before; this is very good. Remaining still pictures will need some additional work, until no genuine pictures remain.
Don't miss the joke.

Here we have the Falling Men. A short one, as this is Holy to the You-tube; they simply don't allow any criticism on this point. As usual, no one care any about any facts. talk to a parachute-jumper, you see what they say.

This is about on how to fake the smoking towers, and I like that a lot.
Then you see my solution to the no-real-photo-problem, where I prefer my solution compared to some magic Military illumination radiation theory. This works in real life. There are however some minor problems, see if you can spot these.

Here are the subliminal pictures, that you have seen before.
It end with an interview with Prof. HÃ¥kan Sundquist, KTH Royal Institute of technology (an university), who come out from the closet and has much to say. Unfortunately, the audience know a bit better than he thinks.
