This DVD list endless strange issues inserted to divert analysis and take up time for researchers.
Nice to have this condensed onto a single DVD.
Note that there are many many more of these issues!

Film questions the strange decisions by President at time of attack.
Bush was sitting in a public school, on location previously announced waiting for a potential Plane .. for half an hour ?!?

This is much better analysed in Open Complicity.
See if there is a viewable copy anywhere ...

Not recommended!
