"bostonterrierowner"I want to add FOOD scam because what we are eating isn't simply what we think we are :) I tend to suspect that PERPS try to achieve great reduction of numbers of people in post production age . They can't just posion all their slaves in a short period of time but paying them pensions and medical benefits is not their alternative of choice either . Once they stop working of course .

Money is crucial to the control system , it is a leash we are held on . It defines our aspirations , dreams , social status , you name it . Perfect tool of control . You can work your ass off gathering money , losing respect to yourself and humankind in general and once you get it you are scared as shit to lose it :)

Basicaly world works like this : Ponzi scheme and later war as a clearing mechanism . Rinse and repeat , a vicious circle .

When credit market exceeds 250 per cent of output in any given economic area it is when a general war breaks out . Creditors fight the debtors and the winner escapes with the spoils . Books are cleared and we can start building another Ponzi scheme .
