The PLANES don't work as a component into "explaining" the 911 event. The discussion below must be read as a complimentary discussion investigating what-if planes where actually used.

MISSILES have also been discussed at length. Initially, there where many reports on missiles, but the importance of this material has declined over time. The current point of view (2011) is that there is no information about zero, one, or two or more missiles; the entire event remain a complete HOAX, and that if some missile was launched is an unimportant element of the event. ON THIS RESEARCHES AGREE, with Simon Shack excusing himself for including the Missiles in September Clues.
