Wish to add the documentary
-- No Planes in Sight ---
for an elementary and detailed analysis of the Pentagon so-called accident.
The video/pictures are simply fake. Spare you the trouble of rebuilding the Pentagon also!

The "CNN America Remembers" DVD torrent includes a very detailed view of the Ghostplane.
This slow-motion take was distilled from the DVD disk using special software (That is inside the "Demokratins_GrÃ¤ns_references.Tufavideo_W3S578T" torrent.

Above version of "In Plane Sight" is of poor quality.
It discuss The Flash and The Pod, that nowadays are simply extra to the 100% Ghostplane fake video.
