Due to that the original thread on the Reality Shack (cluesforum) has been edited, I reproduce the first pages as it appeared in 2010. These posts show that also the still pictures from the 911 event is fake.
FAKING THE RUBBLE PAGE 1
FAKING THE RUBBLE PAGE 2
FAKING THE RUBBLE PAGE 3
FAKING THE RUBBLE PAGE 4
The copy include the pictures, some which are no longer available elsewhere.

This is a video that include the car with double headlights. This is again seen among the rubble.

When you see the man (far to the left) walking on some kind of dirt-road, remember that the WTC complex was set on a 7 floors high steel foot -- there is simply no ground level. The ground level is 7 floors below. So you cannot walk on or run machinery on "the ground" around the (real) Towers. If you see a ground level, the photos are fake.

"No 9/11 image can be trusted" and these two are proven fakes, so I strongly recommend that you don't trust either of them :)
