Simon Shack, in September Clues, show a video-tape version, where a disturbance/missile is shown. Archive versions have the Orb. TV version is with the Orb. The flight paths don't match, as usual.

This is the archive version, with the flying orb. Reported to be almost completely without a plane in the original broadcast. This take also have problems with the flight path. On the still picture, the orb is just next to the tower.

From_internet\South Tower anomolies _thesnic.mpg

Impossible camera position, invisible helicopters, NO PLANE, the take edited, plane inserted, flight path don't match, background erased, and so on it goes.

Note: the crystal clear background, with boats, that should not be taken for real. That is also fake.
