Wish to add the documentary -- No Planes in Sight --for an elementary and detailed analysis of the Pentagon so-called accident. The video/pictures are simply fake. Spare you the trouble of rebuilding the Pentagon also!

The "CNN America Remembers" DVD torrent includes a very detailed view of the Ghostplane. This slow-motion take was distilled from the DVD disk using special software (That is inside the "Demokratins\_Gräns\_references.Tufavideo\_W3S578T" torrent.

Above version of "In Plane Sight" is of poor quality. It discuss The Flash and The Pod, that nowadays are simply extra to the 100% Ghostplane fake video.
