TV\WTC_site_fly_over_TV2_E35.flv

911_clips_collection_to_tufavideo_net.torrent:
TV\WTC_site_fly_over_TV2_E36.flv

The E35 is a bit blurred, but if we start with the WTC_site_fly_over_TV2_E36 take, we clearly see a part of a WTC tower that is fabricated, due to the problem with the cut perimeter columns. So this cannot be a Real Site. It is a fabricated site. I don't care if it is a physical model, or if it is computer generated.

When we compare the "buildings" with the "beam holes" it is clear that it is the same site. Consequently, the WTC_site_fly_over_TV2_E35 is the same fake site. Now, look carefully at the white smoke, especially on the E35 take. It has been glued on to the picture. It does not look real. How about wind? Where should the white smoke come from? And what is the black smoke, that looks like plastic foam? It IS foam?!?
