Note that, in order to produce a good picture, an elevated position was selected for the camera.

Look at the picture, and only at the tower, and you are 200m (approx) up from street level. The surrounding buildings was then inserted.

TV\WTC1_Smoke_addon_DR1_B26.flv

The smoke seems glued to the building. Camera zoom in and give a close-up shot of the Tower.

TV\New_Style_of_burning_tower_DR1_B30.flv

This one looks different compared to most other "burning Towers". The smoke lift slowly on the side of the Tower, and it looks a bit strange.

TV\Tower_Picnic_resolution_1_inch_from_2600feet_DR1_B37.flv

This is a crystal clear image, and I am wondering if it is possible to take a film like this at approx 800m distance. It will likely work with the optics, but I fail to get that hi-zoom-shot feeling. What is wrong?
