The torrent 911 clips collection to tufavideo.net include a set of Real pictures of the WTC towers for your comparison. Even if it is suspected, that some 911-fake-Towers is inserted among the pool of pictures, a majority of these seems to be OK. they also look slightly different from the fake-video Towers. Pleas kindly look into this, and see if the difference can be explained, so we can more easily spot the Fake-Towers.
