

:flower: This is a real Gem!

Video analysis on the Longintro-Ghostplane: Longintro, DVD_2, part 1
This cut is REALLY AWFUL and I claim in the GRN film, that everyone of the many researchers, have come out with their own trophy!!

Therefore, this is a list of some of the video errors; check it out and come back with some additional errors!

The vortex of the plane is missing. This ALONE invalidates the entire take, as the Plane is a Fake!

The Plane cannot fly through the steel lattice façade of the WTC Tower. Backed from behind with 100mm concrete floors.

The Plane cannot "fly" in the tower; fuselage is 5m diameter and floor distance is 12" or 3.658m.

There is no debris ejected from the "crash". This is yet another point that BY ITSELF completely invalidate the entire video.

The weaker wing tips and tail fin can also slice 17,400 mm² cross-section-area steel beams. Fantastic!

Even more FANTASTIC is that, on the video, the steel façade temporarily mend itself behind the wing. Speechless!!

The amount of ejected fuel could be 180m³ but you can only fill 90m³ in the plane. "Official account" estimate it to be only 34m³. If half of this burn outside the Tower, the Fire-Ball would be approx 10x too large.

You cannot fly fast at low altitude; aim accurately at the Tower, and especially not do these two at the same time!!

There is no reaction, due to impulse, on the Tower. We have NEVER seen that on any video, at least up to now.

When the 2nd "Plane" is coming in, the camera zoom out and capture the plane diagonally in the frame. That's is very difficult. The camera also let the plane fly within the frame, and don't try to pan keeping the "Plane" centred. That is also very difficult. (This you should try yourself.)

Hezarkhani is supposed to be on the top deck of a Tour boat. But even when he zoom out completely, not a single object in view can confirm this. There is no rope, fence, object or any other passenger that comes into view.

There are two different sound tracks from the cut!! (As usual, should I add?)

The "audience" is screaming the usual "Ohh-Myyy-Gawwwd". That don't add to the credibility of the cut. It is a studio-psyke-threat soundtrack.

There are MANY rendering errors. One of them is that the "19 Rector Street" building is missing in the Hezarkhani video. (A theory/conspiracy is that an early version of the GoogleMaps had the hight of the building set to zero hight. It is more likely the other way around; Zero hight to match the Hezarkhani video.) "FCS"-Future Combat System, military thing to fight a war aided by a 3D model of the terrain.

"pumpitout.com" a known conspiracy central, have produced an "interview" with Mr. Michael Hezarkhani. The value is limited, as it can not be confirmed. It is unclear if Michael Hezarkhani exists at all! In any case he refuse to answer questions about the video. Especially he cannot explain from where he took the video.

The "Plane" seems to have a "Pod" underneath the fuselage, that is ejected prior to the impact.

Some versions also have a bright flash when the rendered "Plane" impacts.

The whereabouts from where the video was taken is also a "mystery"! The exact location don't exist. You cannot take the camera more backwards than the harbour water line. In reality there are many lamp-posts, trees and other obstacles. The tree-line in the video was arbitrarily inserted to produce a nice shot.

To GRN I suggested that the trees to be declared TRANSPARENT by law!

SUBLIMINAL PICTURES: these mind-converting images produce the horror, scare and mental blocking that make an audience accept the video. YOU CANNOT PROTECT YOURSELF FROM SUCH MATERIAL. Good thing is, that it is time-limited and become weaker if you watch the video several times. If you are certain the video is a FAKE, that also helps!

Subliminal picture: The Ghost (also on Time magazine)

Subliminal picture: The Panda/Dog

Subliminal picture: The Heart

Subliminal picture: The Bear-Pet. The pet also have a smaller bear in her knee.

Subliminal picture: The angry face

Subliminal picture: The small doggy

Subliminal picture: AND THE MAN WHO HOLD A HAND IN FRONT OF HIS FACE: Hair, neck, chin, nose, hand with 4 fingers, two eyes, forehead; he opens his eyes and close them again. Don't miss it!!

Subliminal picture, summary, the ENTIRE smoke cloud is packed with angry terrible things that are coming to bite you! Snakes, spiders, and things like that!

The fire from the tower was not properly rendered to all frames, it has a much lower update frequency. Proven fake! Again, again, and again!!

The left wing of the "Plane" pass in front of a building in the background. It now happens that the rendering software masks the wing during the pass, so it looks like the building is in front of the plane.(How about that?)

Video, about that this Ghostplane isn't even acceptable as fiction,

WAKE THE FUKK UP!!

A DETAILED analysis of this video-fake is in "Longintro" where the entire DVD2 is needed simply to list the most important video errors:

911_WTC_Longintro_Tufavideo_DVD_2010.torrent

The 19 Rector Street is a house that, unfortunately, went missing in the video-render!
It is a yellow skyscraper, see this clip:

We can also add these two clips analysing the "crash":
You find them [HERE](#).

The missing vortex from the plane.
This error apply to all known shots where you can see the smoke from the "Plane" impact.

This show the defining moment, when THE WTC WALL HAS MENDED ITSELF.

(The TV4 know very well that this is a fake.)

In the ghostplane video, the "Plane" go behind a building. There is something completely wrong with the perspective, but I think that a typical flight path actually shall go behind the building, that is front of the flight path.
